

Self-Service Kiosk

Time2Eat Self-Service Kiosk brings quick, intuitive self-service ordering in busy foodservice environments, helping reduce queues and ease pressure on service counters. Customers can easily browse menus, customise items, and place orders independently across outlets. Pair with a Kitchen Management screen and Customer Collection Screen, to support efficient order preparation and a smooth customer journey.

What's in the box?

- 2D Scanner (optional)
- Thermal Receipt Printer (optional)
- 3 Pin Plug Power Cable
- Network Cable

Weight	Floor Standing: 27.3kg Wall Mounted: 14.8kg Desk Mounted: 18.4kg

Installation and Ongoing Support

Available features and order flows may vary based on site configuration and enabled modules. Payment methods supported depend on configured gateways and devices, while loyalty and promotional features are applied based on rules configured in Control Desk.

From certified installations to day-to-day support, Time2Eat Self-Service Kiosk hardware and software are managed through dedicated teams and backed by recognised cyber security accreditations and credentials, ensuring a smooth setup and secure, reliable service across locations.

- A LAN network connection with a minimum speed of 20 Mbps (up/down) is recommended.
- One double 13-amp power socket is recommended.
- An Ethernet data port should be installed within one meter of the power socket.
